Journal of Engineering Mathematics **42:** 391–392, 2002.

Contents of Volume 41 (2001)

Vol. 42 No. 1 January 2002

P. Daripa and R.K. Dash: A numerical study of pulsatile blood flow in an eccentric catherized artery using a fast algorithm 1–22

R.M.S.M. Schulkes and A.C. King: Boundary-layer behaviour in a hydraulic theory of horizontal oil wells 23–44

P.M.J. Trevelyan, S. Kalliadasis, J.H. Merkin and S.K. Scott: Mass-transport enhancement in regions bounded by rigig walls 45–64

K. Kirkkopru, D.R. Kassoy, Q. Zhao and P.L. Staab: Acoustically generated unsteady vorticity field in a long narrow cylinder with sidewall injection 65–90

Vol. 42 No. 2 February 2002

C.W.M. van der Geld: On the motion of a spherical bubble deforming near a plane wall 91–118

D.S. Jones: TE-impedance of a coated right-angled wedge 119–131

P.A. Martin: On functionally graded balls and cones 133–142

S.T. Ariaratnam and M.S. Fofana: The effects of nonlinearity in turning operation 143–156

C. Pozrikidis: Buckling and collapse of open and closed cylindrical shells 157–180

A.V. Pichugin and G.A. Rogerson: Anti-symmetric motion of a pre-stressed incompressible elastic layer near shear resonance 181–202

T. Götz: On collocation schemes for integral equations arising in slender-body approximations of flow past particles with circular cross-section 203–221

Vol. 42 Nos. 3–4 April 2002

Introduction 223

D. Crowdy: Exact solutions for the viscous sintering of multiply-connected fluid domains 225–242

L. W. Schwartz: Numerical modeling of liquid withdrawal from gravure cavities in coating operations; the effect of cell pattern 243–253

E. O. Tuck and D. C. Scullen: A comparison of linear and nonlinear computations of waves made by slender submerged bodies 255–264

S. P. Decent, A. C. King and I. M. Wallwork: Free jets spun from a prilling tower 265–282

J. B. Keller, P. A. Milewski and J.-M. Vanden-Broeck: Breaking and merging of liquid sheets and filaments 283–290

F. Dias and J.-M. Vanden-Broeck: Generalised critical free-surface flows 291–301

L. Li, D. P. Papadopolous, F. T. Smith and G. X. Wu: Rapid plunging of a body partly submerged in water 303–319

L. L. Barannyk and D. T. Papageorgiou: Fully nonlinear gravity-capillary solitary waves in a two-fluid system of finite depth 321–339

A. P. Rothmayer, B. D. Matheis and S. N. Timoshin: Thin liquid films flowing over external aerodynamic surfaces 341–357

S. K. Wilson and B. R. Duffy: On the gravity-driven draining of a rivulet of fluid with temperature-dependent viscosity down a uniformly heated or cooled substrate 359–372

S. D. Howison, J. R. Ockendon and J. M. Oliver: Deep- and shallow-water slamming at small and zero deadrise angles 373–388
